# Inpatient Data Dictionary

Welcome to the HES Inpatient Data Dictionary. If you have any feedback or suggestions about this document please don't hesitate to [contact us](http://www.hesonline.nhs.uk/Ease/servlet/ContentServer?siteID=1937&categoryID=377) [<http://www.hesonline.nhs.uk/Ease/servlet/ContentServer?siteID=1937&categoryID=377>].

## About the Inpatient Data Dictionary

The Hospital Episode Statistics (HES) database is made up of many data items relating to admitted patient care delivered by NHS hospitals in England. Many of these items form part of the national Commissioning Data Set (CDS), and are generated by the patient administration systems within each hospital.

In addition to the CDS items, HES provides information that is derived from these. For example, the age of the patient is derived from their date of birth. These derivations assist in the production of aggregate summaries (tabulations), and also help ensure patient confidentiality.

HES contains data from 1 April 1989. Over the years, there have been several changes in the specification and meaning of various data items. From April 2003, this data was available in a normalised form that makes interpretation easier. This has been achieved by modifying the values of certain items for previous years so that, where possible, they conform to contemporary standards. This issue of the Data Dictionary reflects the situation after normalisation.

## Admissions

Admission date check flag (adm_cfl)	8
Date of admission (admidate)	8
Date of decision to admit (elecdate)	9
Date of decision to admit check flag (elec_cfl)	9
First regular day or night admission (firstreg)	10
Method of admission (admimeth)	11
Source of admission (admisorc)	12
Waiting time (elecduur)	12

**HES field name**    **Admission date check flag**

Field	adm_cfl
Class	Admissions
Length and format	1n
Availability	All years

**Description**

Codes in this field indicate whether the patient's admission date is valid.

**Value**

0 = Valid (or missing because not required)

1 = Missing

2 = Invalid

<b>Data cleaning</b>	Not applicable (derived by rule 35)
----------------------	-------------------------------------

**HES field name**    **Date of admission**

Field	admidate
Class	Admissions
Length and format	dd/mm/yyyy (Date)
Availability	All years

**Description**

This field contains the date the patient was admitted to hospital at the start of a hospital spell. Admidate is recorded on all episodes within a spell.

**Value**

dd/mm/yyyy = Date

null = Date not known / not applicable

<b>Data cleaning</b>	Rule 35
----------------------	---------

**HES field name**    **Date of decision to admit**

Field	elecdate
Class	Admissions
Length and format	dd/mm/yyyy (Date)
Availability	All years

**Description**

This field contains the date on which a consultant, or another member of the clinical staff, decided to admit the patient to a hospital.

The patient may or may not be admitted immediately. The time between elecdate and admdate (admission date) is known as the waiting time.

**Value**

dd/mm/yyyy = Date

null = Date not known / not applicable

<b>Data cleaning</b>	Rules 40 and 45
----------------------	-----------------

**HES field name**    **Date of decision to admit check flag**

Field	elec_cfl
Class	Admissions
Length and format	1n
Availability	All years

**Description**

Codes in this field indicate whether the decision to admit date is valid.

**Value**

0 = Valid (or missing because not required)

1 = Missing

2 = Invalid

<b>Data cleaning</b>	Not applicable: derived by Rules 40 and 45
----------------------	--

**HES field name**    **First regular day or night admission**

Field	firstreg
Class	Admissions
Length and format	1n
Availability	From 2002-03

**Description**

This field indicates whether the episode falls within a sequence of regular day and night admissions and, if so, whether it is the first or subsequent episode within the sequence.

**Value**

0 = First in a series

1 = Subsequent to first in a series

8 = Not applicable: this episode of care is neither the first nor any subsequent attendance within a sequence of regular day/night admissions

9 = Not known: this episode is an attendance within a sequence of regular day/night admissions, but the status of this episode within the attendance is not known: a validation error

Data cleaning	None
---------------	------

HES field name	Method of admission
Field	admimeth
Class	Admissions
Length and format	2n
Availability	All years
Description	
<p>This field contains a code which identifies how the patient was admitted to hospital. Admimeth is recorded on the first and also all subsequent episodes within the spell (ie where the spell is made up of more than one episode).</p>	
Value	
<p>11 = Elective: from waiting list</p> <p>12 = Elective: booked</p> <p>13 = Elective: planned</p> <p>21 = Emergency: via Accident and Emergency (A&amp;E) services, including the casualty department of the provider</p> <p>22 = Emergency: via general practitioner (GP)</p> <p>23 = Emergency: via Bed Bureau, including the Central Bureau</p> <p>24 = Emergency: via consultant outpatient clinic</p> <p>28 = Emergency: other means, including patients who arrive via the A&amp;E department of another healthcare provider</p> <p>31 = Maternity: where the baby was delivered after the mother's admission</p> <p>32 = Maternity: where the baby was delivered before the mother's admission</p> <p>81 = Transfer of any admitted patient from another hospital provider other than in an emergency; this does not include admissions to high security psychiatric hospitals (HSPH)</p> <p>82 = Other: babies born in health care provider</p> <p>83 = Other: babies born outside the health care provider, except when born at home as intended</p> <p>84 = Admission by the admission panel of an HSPH; patient not entered on the HSPH admissions waiting list (not valid for admissions after 31 March 2002)</p> <p>89 = From the admissions waiting list of an HSPH (not valid for admissions after 31 March 2002)</p> <p>98 = Not applicable (eg other maternity event)</p> <p>99 = Not known</p>	
Data cleaning	Rules 65, 70 and 320

HES field name	Source of admission
Field	admisorc
Class	Admissions
Length and format	2n
Availability	All years
Description	
<p>This field contains a code which identifies where the patient was immediately prior to admission.</p> <p>Most patients are admitted from home, but there are some significant exceptions. In particular, this field differentiates between patients admitted from home and patients transferred from another hospital provider or institution.</p>	
Value	
<p>19 = The usual place of residence, including no fixed abode  29 = Temporary place of residence when usually resident elsewhere, for example, hotels and residential educational establishments  30 = Repatriation from high security psychiatric hospital (1999-00 to 2006-07)  37 = Penal establishment: court (1999-00 to 2006-07)  38 = Penal establishment: police station (1999-00 to 2006-07)  39 = Penal establishment (court and police station excluded from 1999-2000)  48 = High security psychiatric hospital, Scotland (1999-00 to 2006-07)  49 = NHS other hospital provider: high security psychiatric accommodation in an NHS hospital provider (NHS trust)  50 = NHS other hospital provider: medium secure unit (1999-00 to 2006-07)  51 = NHS other hospital provider: ward for general patients or the younger physically disabled or A&amp;E department  52 = NHS other hospital provider: ward for maternity patients or neonates  53 = NHS other hospital provider: ward for patients who are mentally ill or have learning disabilities  54 = NHS run nursing home, residential care home or group home  65 = Local authority Part 3 residential accommodation: where care is provided (from 1996-97)  66 = Local authority foster care, but not in Part 3 residential accommodation: where care is provided (from 1996-97)  69 = Local authority home or care (1989-90 to 1995-96)  79 = Babies born in or on the way to hospital  85 = Non-NHS (other than Local Authority) run residential care home (from 1996-97)  86 = Non-NHS (other than Local Authority) run nursing home (from 1996-97 to 2006-07)  87 = Non-NHS run hospital  88 = non-NHS (other than Local Authority) run hospice  89 = Non-NHS institution (1989-90 to 1995-96)  98 = Not applicable  99 = Not known</p>	
Data cleaning	Rule 80

**HES field name**   **Waiting time**

Field	elecdur
-------	---------

Class	Admissions
-------	------------

Length and format	4n
-------------------	----

Availability	
--------------	--

**Description**

This derived field contains the difference in days between the date on which it was decided to admit the patient (elecdate) and the actual admission date (admidate).

Elecdur is only applicable where an elective admission (ie the admission method is 11, 12 or 13) was scheduled and took place.

**Value**

4n = Waiting time in days from 1 to 8887

null = Other maternity events / not known

Data cleaning	Not applicable (derived by rule 270)
---------------	--------------------------------------

## Augmented/critical care period

ACP sequence number (acpseq)	14
Augmented care location (acploc)	16
Augmented care period disposal (acpdisp)	17
Augmented care period end date (acpend)	18
Augmented care period local ID (acplcid)	18
Augmented care period number (acpn)	19
Augmented care period outcome indicator (acpout)	19
Augmented care period planned indicator (acpplan)	20
Augmented care period source (acpsour)	21
Augmented care period speciality function code (acpspef)	22
Augmented care period start date (acpstar)	24
High-dependency care level (depdays)	24
Intensive care level days (intdays)	25
Number of augmented care periods within episode (numacp)	25
Number of organ systems supported (orgsup)	26

HES field name	ACP sequence number
Field	acpseq
Class	Augmented/critical care period
Length and format	1n
Availability	From 1 October 1997 to 31 March 2006
Description	Augmented care period sequence number.
Value	n = ACP sequence number
Data cleaning	None

HES field name	Augmented care location
----------------	-------------------------

Field	acploc
-------	--------

Class	Augmented/critical care period
-------	--------------------------------

Length and format	2n
-------------------	----

Availability	From 1 October 1997 to 31 March 2006
--------------	--------------------------------------

Description
-------------

This field gives the location of a patient during a period of augmented care.

Value
-------

01 = General intensive care unit (ICU). Adult intensive care, including wards labelled as surgical or medical ICU, but excluding the specialised units identified by other values. General ICUs may provide a mixture of high dependency unit (HDU) and ICU level care.

02 = Cardiothoracic ICU, including units labelled as separate cardiac or thoracic units.

03 = Liver ICU

04 = Neurological ICU

05 = HDU

06 = Paediatric ICU: a unit generally admitting patients between 0 and 14 years old, but excluding special care baby units

07 = Paediatric HDU

08 = Neonatal ICU: a unit generally admitting only new born babies up to two-week's post delivery

09 = Cardiac care unit or coronary care unit (CCU)

10 = Combined HDU and CCU

the beds and staff for the two units are in the same area

11 = Combined CCU and ICU

the beds and staff for the two units are in the same area

12 = Combined HDU and ICU

the beds and staff for the two units are in the same area

13 = Post operative recovery unit, including a theatre recovery area

14 = Spinal injury ICU: a unit designated for critical care rather than a spinal injury ward

15 = Burns critical care unit, including all special care burns facilities other than short-term post-operative care areas

16 = Renal unit, including an in-patient kidney dialysis unit, but excluding general nephrology or urology wards

17 = Not otherwise specified

99 = Not known

Data cleaning	Rules 950 and 960
---------------	-------------------

**HES field name**    **Augmented care period disposal**

Field	acpdisp
Class	Augmented/critical care period
Length and format	2n
Availability	From 1 October 1997 to 31 March 2006

**Description**

This field gives the destination of a discharged patient after a period of augmented care. Compare this field with disdest (destination on discharge from a hospital episode).

**Value**

- 01 = Ward in same hospital
- 02 = High dependency unit (HDU) in same hospital, including special care baby units
- 03 = Intensive care unit (ICU) in same hospital
- 04 = ICU in other hospital
- 05 = Other hospital (not ICU) including HDUs and Special Care Baby Units
- 06 = Normal residence or other
- 07 = Died
- 08 = No change in location: the augmented care period ended because the consultant episode ended
- 98 = Not applicable: augmented care period not finished
- 99 = Not known

<b>Data cleaning</b>	Rules 920 and 930
----------------------	-------------------

**HES field name**    **Augmented care period end date**

Field	acpend
Class	Augmented/critical care period
Length and format	dd/mm/yyyy (Date)
Availability	From 1 October 1997 to 31 March 2006

**Description**

This field gives the end date of a period of augmented care (a null entry indicates that this data is not applicable).

**Value**

dd/mm/yyyy = Date augmented care period ended

Data cleaning	Rule 940
---------------	----------

**HES field name**    **Augmented care period local ID**

Field	acplcid
Class	Augmented/critical care period
Length and format	8an
Availability	From 2002-03 to 31 March 2006

**Description**

There are no nationally agreed values for this item. This field contains sensitive data. Access to it requires the approval of the Database Monitoring Sub-Group (DMSG).

**Value**

Not available

Data cleaning	None
---------------	------

**HES field name**    **Augmented care period number**

Field	acpn
Class	Augmented/critical care period
Length and format	2n
Availability	From 1 October 1997 to 31 March 2006

**Description**

This field contains a number representing the order of an episode within a sequence of episodes that make up a period of augmented care.

**Value**

2n = Order number in the range 01 to 97

99 = Not known: a validation error

<b>Data cleaning</b>	Rule 970
----------------------	----------

**HES field name**    **Augmented care period outcome indicator**

Field	acpout
Class	Augmented/critical care period
Length and format	2n
Availability	From 1 October 1997 to 31 March 2006

**Description**

This field identifies whether a patient survived. For deaths it indicates whether organs were donated.

Organs are defined as whole organs such as heart, lung, liver, kidney and pancreas. The value 03 does not include parts of organs such as corneas, heart valves, etc.

**Value**

01 = Survived

02 = Died: no organ donation

03 = Died: organs donated

98 = Not applicable: Augmented care period not finished

99 = Not known

<b>Data cleaning</b>	Rule 980 and Rule 990
----------------------	-----------------------

**HES field name**    **Augmented care period planned indicator**

Field	acpplan
-------	---------

Class	Augmented/critical care period
-------	--------------------------------

Length and format	1n
-------------------	----

Availability	From 1 October 1997 to 31 March 2006
--------------	--------------------------------------

**Description**

This field indicates whether any part of the ACP was planned in advance of admission to the ACP location.

**Value**

1 = Yes

2 = No

9 = Not known

Data cleaning	Rule 1000
---------------	-----------

**HES field name**    **Augmented care period source**

Field	acpsour
Class	Augmented/critical care period
Length and format	2n
Availability	From 1 October 1997 to 31 March 2006

**Description**

This field defines where the patient was immediately before the period of augmented care. Compare this field with admisorc (source of patient for a hospital episode).

**Value**

01 = Ward in same hospital

02 = High dependency unit (HDU) or other immediate care area in same hospital, including special care babies

03 = Intensive care unit (ICU) in same hospital

04 = Theatre or recovery unit in same hospital

05 = A&E department in same hospital

06 = X-ray or endoscopy department in same hospital

07 = ICU in other hospital

08 = Other hospital (not ICU) including HDUs and special care baby units

09 = Clinic, home or other

10 = No change in location: augmented care period started because consultant episode changed

99 = Not known

<b>Data cleaning</b>	Rule 900 and Rule 910
----------------------	-----------------------

HES field name	Augmented care period speciality function code
----------------	--

Field	acpspef
Class	Augmented/critical care period
Length and format	3n
Availability	From 1 October 1997 to 31 March 2006

Description
-------------

This field contains the code for the main specialty of the consultant clinically managing the period of augmented care.

This consultant is not necessarily the same as the one responsible for the hospital episode.

Where a patient is cared for by a team of specialists within an Intensive Care rota, this field contains the specialty of the team's clinical director.

Where there are several specialties involved but none is considered responsible, this field contains the specialty of the consultant admitting the patient to the period of augmented care.

If no specific consultant or team can be identified as organising the care associated with the ACP, then this should be the same as for the related consultant episode.

Value
-------

100 = General surgery  
 101 = Urology  
 110 = Trauma and orthopaedics  
 120 = Ear, nose and throat (ENT)  
 130 = Ophthalmology  
 140 = Oral surgery

Length and format	dd/mm/yyyy (Date)
Availability	

**Description**

This field contains the dates for operations recorded in the operation codes (oper\_nn) field. There is room for twenty-four dates (twelve prior to April 2002).

**Value**

dd/mm/yyyy = Date of operation

<b>Data cleaning</b>	Rules 480, 485, 610 and 620
----------------------	-----------------------------

**HES field name**    **All diagnosis codes**

Field	diag_nn
Class	Clinical
Length and format	6an
Availability	

**Description**

There are twenty fields (fourteen before April 2007 and seven before April 2002), diag\_01 to diag\_20, which contain information about a patient's illness or condition.

The field diag\_01 contains the primary diagnosis. The other fields contain secondary/subsidiary diagnoses. The codes are defined in the International Statistical Classification of Diseases, Injuries and Causes of Death.

HES records currently use the tenth revision (ICD-10). Prior to April 1995, the ninth revision was used (ICD-9). Diagnosis codes start with a letter and are followed by two or three digits. The third digit identifies variations on a main diagnosis code containing two digits.

The third digit is preceded by a full stop in ICD-10, but this is not stored in the field.

**Value**

annnna = A valid ICD-9 or ICD-10 diagnosis code

annnnn = A valid ICD-9 or ICD-10 diagnosis code

null = not applicable

**Data cleaning**

Rule 90 and Rule 350

**HES field name**    **All operative procedure codes**

Field	oper_nn
-------	---------

Class	Clinical
-------	----------

Length and format	4an, - or &
-------------------	-------------

Availability	
--------------	--

**Description**

There are twenty-four fields (twelve before April 2007 and four prior to April 2002), oper\_01 to oper\_24, which contain information about a patient's operations.

The field oper\_01 contains the main (ie most resource intensive) procedure. The other fields contain secondary procedures.

The codes are defined in the Tabular List of the Classification of Surgical Operations and Procedures. The current version is OPCS4. Procedure codes start with a letter and are followed by two or three digits.

The third digit identifies variations on a main procedure code containing two digits. The third digit is preceded by a full stop in OPCS4, but this is not stored in the field. A single operation may contain more than one procedure.

**Value**

4an = Procedure code

- = No operation performed

& = Not known

Data cleaning	Rules 450, 540, 550, 560, 610 and 620
---------------	---------------------------------------

## **HES field name** Ambulatory Care Sensitive Condition Flag

Field	Acscflag
Class	Diagnosis
Length and format	1n
Availability	2007-2008 onwards

### Description

Ambulatory Care Sensitive Condition flag is derived for finished APC episodes where the admission method is 'emergency'. The flag indicates whether the episode contains a diagnosis which is ambulatory care sensitive

### Value

1 = episode contains a diagnosis that is ambulatory care sensitive  
0 = episode doesn't contain a diagnosis that is ambulatory care sensitive

### Data cleaning

Derived by rule 509

**HES field name** Principal alcohol related diagnosis

Field	Alcdiag
Class	Diagnosis
Length and format	6an
Availability	2002-2003 onwards

**Description**

Indicates the diagnosis code with the highest alcohol attributable fraction. Where this applies to more than one code, the code that appears earliest in the sequence of diagnosis fields is used. Where no alcohol attributable diagnosis is present this field will be null. Please refer to the supplementary table, 'Refreshed Indicator Conditions and Fractions', on the Data Dictionaries page of [HESonline](http://www.hesonline.nhs.uk/Ease/servlet/ContentServer?siteID=1937&categoryID=289) for more information [http://www.hesonline.nhs.uk/Ease/servlet/ContentServer?siteID=1937&categoryID=289].

**Value**

annnna = A valid ICD-9 or ICD-10 diagnosis code

annnnn = A valid ICD-9 or ICD-10 diagnosis code

null = not applicable

**Data cleaning**

Derived by rule 1230

**HES field name** Principal alcohol related fraction

Field	Alcfrac
Class	Diagnosis
Length and format	n.nn
Availability	2002-2003 onwards

**Description**

Indicates the highest alcohol attributable fraction within the episode based on the principal alcohol related diagnosis. Please refer to the supplementary table, 'Refreshed Indicator Conditions and Fractions', on the Data Dictionaries page of [HESonline](http://www.hesonline.nhs.uk/Ease/servlet/ContentServer?siteID=1937&categoryID=289) for more information [http://www.hesonline.nhs.uk/Ease/servlet/ContentServer?siteID=1937&categoryID=289].

**Value**

-

## Discharges

Date of discharge (disdate)	45
Destination on discharge (disdest)	46
Discharge date check flag (dis_cfl)	48
Discharge ready date (disreadydate)	48
Method of discharge (dismeth)	49

**HES field name**    **Date of discharge**

Field	disdate
-------	---------

Class	Discharges
-------	------------

Length and format	dd/mm/yyyy (Date)
-------------------	-------------------

Availability	All years
--------------	-----------

**Description**

This field contains the date on which the patient was discharged from hospital.

It is only present in the record for the last episode of a spell.

**Value**

d/mm/yyyy = Date

null = Date not known / not applicable

Data cleaning	Rules 205, 210, 220 and 223
---------------	-----------------------------

HES field name	Destination on discharge
Field	disdest
Class	Discharges
Length and format	2n
Availability	
Description	
<p>This field contains a code which identifies where the patient was due to go on leaving hospital. In most cases they return home.</p> <p>For many patients discharge destination is the same as source of admission (admisorc).</p>	
Value	
<p>19 = The usual place of residence, including no fixed abode</p> <p>29 = Temporary place of residence when usually resident elsewhere, for example, hotels and residential educational establishments</p> <p>30 = Repatriation from high security psychiatric hospital (from 1999-2000)</p> <p>37 = Penal establishment - court (from 1999-2000)</p> <p>38 = Penal establishment - police station (from 1999-2000)</p> <p>39 = Penal establishment - court and police station excluded (from 1999-2000 to 2006-07)</p> <p>48 = High security psychiatric hospital, Scotland (from 1999-2000)</p> <p>49 = NHS other hospital provider - high security psychiatric accommodation</p> <p>50 = NHS other hospital provider - medium secure unit (from 1999-2000)</p> <p>51 = NHS other hospital provider - ward for general patients or the younger physically disabled</p> <p>52 = NHS other hospital provider - ward for maternity patients or neonates</p> <p>53 = NHS other hospital provider - ward for patients who are mentally ill or have learning disabilities</p> <p>54 = NHS run nursing home, residential care home or group home</p> <p>65 = Local authority Part 3 residential accommodation - where care is provided (from 1996-97)</p> <p>66 = Local authority foster care, but not in Part 3 residential accommodation - where care is provided (from 1996-97)</p> <p>69 = LA home or care (1989-90 to 1995-96)</p> <p>79 = Not applicable - patient died or still birth</p> <p>84 = Non-NHS run hospital - medium secure unit (from 2003-04)</p> <p>85 = Non-NHS (other than local authority) run residential care home (from 1996-97 to 2003-04)</p> <p>85 = Non-NHS (other than local authority) run care home (from 2003-04)</p> <p>86 = Non-NHS (other than local authority) run nursing home (from 1996-97 to 2003-04)</p> <p>87 = Non-NHS run hospital</p> <p>88 = Non-NHS (other than local authority) run hospice</p> <p>89 = Non-NHS institution (1989-90 to 1995-96)</p>	

98 = Not applicable

99 = Not known

Data cleaning

Rules 205, 210, 220 and 223

**HES field name**    **Discharge date check flag**

Field	dis_cfl
Class	Discharges
Length and format	1n
Availability	

**Description**

Codes in this field indicate whether the discharge date (disdate) is valid.

**Value**

0 = Valid (or missing because not required)  
1 = Missing  
2 = Invalid

<b>Data cleaning</b>	Not applicable (derived by rules 205, 210, 220 and 223)
----------------------	---

**HES field name**    **Discharge ready date**

Field	disreadydate
Class	Discharges
Length and format	dd/mm/yyyy (Date)
Availability	2007-08, Quarter 3 onwards

**Description**

The date that a patient was medically ready for discharge from a hospital bed, but couldn't be discharged, therefore qualifying for delayed discharge payments.

**Value**

dd/mm/yyyy = discharge ready date

<b>Data cleaning</b>	Data not cleaned
----------------------	------------------

**HES field name**    **Method of discharge**

Field	dismeth
Class	Discharges
Length and format	1n
Availability	

**Description**

This field contains a code which defines the circumstances under which a patient left hospital. For the majority of patients this is when they are discharged by the consultant.

This field is only completed for the last episode in a spell.

**Value**

- 1 = Discharged on clinical advice or with clinical consent
- 2 = Self discharged, or discharged by a relative or advocate
- 3 = Discharged by a mental health review tribunal, the Home Secretary or a court
- 4 = Died
- 5 = Baby was still born
- 8 = Not applicable: patient still in hospital
- 9 = Not known: a validation error

<b>Data cleaning</b>	Rules 205, 210, 220, 223 and 320
----------------------	----------------------------------

## Episodes and spells

Bed days within the year (bedyear)	51
Beginning of spell (spelbgin)	52
Date episode ended (epiend)	52
Date episode started (epistart)	53
Duration of spell (speldur)	53
End of spell (spelend)	54
Episode duration (epidur)	54
Episode end date check flag (epie_cfl)	55
Episode order (epiorder)	56
Episode start date check flag (epis_cfl)	57
Episode status (epistat)	58
Episode type (epitype)	59
Hospital provider spell number (provspno)	59
Ward type at start of episode (wardstrt)	60

**HES field name**    **Bed days within the year**

Field	bedyear
Class	Episodes and spells
Length and format	3n
Availability	All years

**Description**

This derived field provides the duration of an episode in days within the HES data year. It is derived from epistart (episode start date) and epiend (episode end date).

For episodes that both start and finish in the data year, bedyear has the same value as epidur (episode duration). If the episode is unfinished, bedyear is calculated from epistart and the end of the data year.

If epistart is before the beginning of the data year, bedyear is calculated from the start of the data year and epiend. If the record type is other maternity events (episode type 5 or 6), bedyear is null.

**Value**

3n = The number of days of stay from 0 to 366

null = Not applicable (other maternity event / not known)

<b>Data cleaning</b>	Not applicable (derived by rule 240)
----------------------	--------------------------------------

**HES field name**    **Beginning of spell**

Field	spelbgin
Class	Episodes and spells
Length and format	1n
Availability	

**Description**

This derived field contains a code that defines whether the episode is the first of a spell and whether the spell started in the current or previous year. Other maternity events are excluded.

**Value**

0 = Not first episode of spell  
1 = First episode of spell that started in previous year  
2 = First episode of spell that started in current year  
null = Not applicable

<b>Data cleaning</b>	Not applicable (derived by rule 1170)
----------------------	---------------------------------------

**HES field name**    **Date episode ended**

Field	epiend
Class	Episodes and spells
Length and format	dd/mm/yyyy (Date)
Availability	

**Description**

This field contains the date on which a patient left the care of a particular consultant, for one of the following reasons:

Discharged from hospital (includes transfers) or moved to the care of another consultant.

A null entry either indicates that the episode was unfinished at the end of the data year, or the date was unknown.

**Value**

dd/mm/yyyy = Date episode ended  
null = Not applicable / not known

<b>Data cleaning</b>	Rules 190, 200 and 203
----------------------	------------------------

**HES field name**    **Date episode started**

Field	epistart
Class	Episodes and spells
Length and format	dd/mm/yyyy (Date)
Availability	

**Description**

This field contains the date on which a patient was under the care of a particular consultant. If a patient has more than one episode in a spell, for each new episode there is a new value of epistart.

However, the admission date which is copied to each new episode in a spell will remain unchanged and will be equal to the episode start date of the first episode in hospital.

**Value**

dd/mm/yyyy = Date episode started

null = Not applicable / not known

<b>Data cleaning</b>	Rule 30
----------------------	---------

**HES field name**    **Duration of spell**

Field	speldur
Class	Episodes and spells
Length and format	5n
Availability	

**Description**

This derived field contains the difference in days between the admission date (admidate) and the discharge date (epiend) provided the discharge method (dismeth) confirms that the spell has finished.

If the episode has not finished it is calculated from the end of the year and admidate.

**Value**

5n = Duration of spell in days from 0 to 29,200

null = Not applicable: patient not discharged (dismeth not in range 1-5), other maternity event (epitype is 5 or 6) or not valid

<b>Data cleaning</b>	Not applicable (derived by rule 1180)
----------------------	---------------------------------------

**HES field name**   **End of spell**

Field	spelend
Class	Episodes and spells
Length and format	1a
Availability	

**Description**

This field contains a code which defines whether the episode is the last of a spell.

It is set for finished episodes (episode status - epistat - is 3) for general, delivery or birth episodes (episode type - epitype - is 1, 2 or 3) provided the discharge method (dismeth) confirms that the spell has finished.

**Value**

Y = Last episode of spell

N = Not last episode of spell

<b>Data cleaning</b>	Not applicable (derived by rule 1190)
----------------------	---------------------------------------

**HES field name**   **Episode duration**

Field	epidur
Class	Episodes and spells
Length and format	5n
Availability	

**Description**

This field contains the difference in days between the episode start date (epistart) and the episode end date (epiend).

If the episode is unfinished epidur is set as null.

**Value**

5n = Duration of episode in days from 0 to 29,200

null = Not applicable (other maternity event or not known)

<b>Data cleaning</b>	Not applicable (derived by rule 250)
----------------------	--------------------------------------

**HES field name**   **Episode end date check flag**

Field	epie_cfl
-------	----------

Class	Episodes and spells
-------	---------------------

Length and format	1n
-------------------	----

Availability	
--------------	--

**Description**

This field validates the episode end date (epiend).

**Value**

0 = Valid (or missing because not required)

1 = Missing

2 = Invalid

Data cleaning	Not applicable
---------------	----------------

**HES field name**   **Episode order**

Field	epiorder
Class	Episodes and spells
Length and format	2n
Availability	

**Description**

This field contains the number of the episode within the current spell. All spells start with an episode where epiorder is 01.

Many spells finish with this episode, but if the patient moves to the care of another consultant, a new episode begins. Episode numbers increase by 1 for each new episode until the patient is discharged (this includes transfers to another NHS trust or primary care trust - ie the first episode in the new trust will have epiorder 01).

If the same patient returns for a different spell in hospital, epiorder is again set to 01.

Admissions are calculated by counting the number of times epiorder is 01. When studying long term care, remember that it is not unusual to transfer psychiatric patients from one hospital to another.

**Value**

2n = The number of the episode in the sequence of episodes from 01-87

98 = Not applicable

99 = Not known

null = Not applicable: other maternity event

<b>Data cleaning</b>	Rules 130, 140 and 320
----------------------	------------------------

**HES field name**   **Episode start date check flag**

Field	epis_cfl
-------	----------

Class	Episodes and spells
-------	---------------------

Length and format	1n
-------------------	----

Availability	
--------------	--

**Description**

This field validates the episode start date (epistart).

**Value**

0 = Valid (or missing because not required)

1 = Missing

2 = Invalid

Data cleaning	Not applicable (derived by rule 30)
---------------	-------------------------------------

**HES field name**   **Episode status**

Field	epistat
Class	Episodes and spells
Length and format	1n
Availability	

**Description**

This field tells you whether the episode had finished before the end of the HES data-year (ie whether the episode was still 'live' at midnight on 31 March).

For example, if a patient was admitted on 25 March 2005 and was not discharged (or transferred to the care of another consultant) until 4 April 2005, there will be a record describing the unfinished episode (episode status = 1) in the 2004-05 data, and a separate record describing the finished episode (episode status = 3) in the 2005-06 data.

Because hospital providers are advised not to include clinical data (diagnosis and operation codes) in unfinished records, these are normally excluded from analyses.

Also, if unfinished episodes are included in time series analyses - where data for more than one year is involved - there is a danger of counting the same episode twice.

**Value**

1 = Unfinished

3 = Finished

9 = Derived unfinished (not present on processed data)

<b>Data cleaning</b>	Rules 170 and 180
----------------------	-------------------

**HES field name**   **Episode type**

Field	epitype
Class	Episodes and spells
Length and format	1n
Availability	

**Description**

This field contains a code that defines the type of episode, so that groups of similar episodes can be formed.

**Value**

- 1 = General episode (anything that is not covered by the other codes)
- 2 = Delivery episode
- 3 = Birth episode
- 4 = Formally detained under the provisions of mental health legislation or long-term (over one year) psychiatric patients who should have additional information recorded on the psychiatric census. This value can only appear in unfinished records
- 5 = Other delivery event
- 6 = Other birth event

Data cleaning	Rules 150 & 160
---------------	-----------------

**HES field name**   **Hospital provider spell number**

Field	provspno
Class	Episodes and spells
Length and format	12an
Availability	From 1997-98

**Description**

Hospital provider spell number. A number to provide a unique identifier for each Hospital Provider Spell for a Health Care Provider.

**Value**

Not available

Data cleaning	None
---------------	------

**HES field name**   **Ward type at start of episode**

Field	wardstrt
Class	Episodes and spells
Length and format	7n
Availability	From 1997-98 until 31 March 2001

**Description**

This field contains a code that defines the characteristics of a ward. The code has six parts: AABCDEF.

**Value**

A is as follows:

71 = Home leave, non-psychiatric

72 = Home leave, psychiatric

B is age as follows:

1 = Neonates

2 = Children and adolescents

3 = Elderly

8 = Any age

9 = Invalid

C is sex as follows:

8 = Not specified

9 = Invalid

D is the hospital provider as follows:

1 = NHS hospital provider

2 = Non-NHS hospital provider

9 = Invalid

E is the number of days in a week that the ward is open only during the day

F is the number of days in a week that the ward is open at night

<b>Data cleaning</b>	None

**HES field name**    **Census Output Area, 2001**

Field	Oacode
Class	Geographical
Length and format	10an
Availability	From 2003-04 onwards

**Description**

Census Output Areas (OAs) are small geographical areas that cover similar population sizes, according to the 2001 census, and are as socially homogenous as possible.

There are 165,665 Census Output Areas in England. The first six characters of this derived field represent the 2003 statistical ward. The Census output area, 2001 (oacode) field contains sensitive data.

Access to it requires the approval of the Database Monitoring Sub-Group (DMSG).

**Description**

Birth sequence.

**Value**

1n = birth sequence

Data cleaning	None
---------------	------

**HES field name**   **Baby's age in days**

Field	neodur
-------	--------

Class	Maternity
-------	-----------

Length and format	2n
-------------------	----

Availability	
--------------	--

**Description**

This field contains the age in days of a baby admitted as a patient. It is derived from admission date (admidate) and date of birth (dob). If the baby is older than 27 days, neodur is not calculated.

**Value**

2n = Age of patient in days from 0 to 27

null = Not applicable: other maternity event (epitype is 5 or 6) or baby is older than 27 days

Data cleaning	Not applicable
---------------	----------------

**HES field name**   **Birth date (baby)**

Field	dobbaby
-------	---------

Class	Maternity
-------	-----------

Length and format	dd/mm/yyyy (Date)
-------------------	-------------------

Availability	
--------------	--

**Description**

Baby's date of birth. This item appears for each baby on multiple birth delivery records. The Birth date - baby (dobbaby) field contains sensitive data.

Access to it requires the approval of the Database Monitoring Sub-Group (DMSG).

**Value**

dd/mm/yyyy = Date of birth

Data cleaning	Rule 670
---------------	----------

**HES field name**   **Birth order**

Field	birorder
-------	----------

Class	Maternity
-------	-----------

Length and format	1n or X
-------------------	---------

Availability	
--------------	--

**Description**

The position in the sequence of births. This item appears for each baby on multiple birth delivery records.

From 1996-97 the same value (1) is used for a single birth or the first born of several. Up until March 2002, only the first six births were recorded.

**Value**

1 = First, including single, birth

2 = Second

3 = Third

4 = Fourth

5 = Fifth

6 = Sixth

7 = Seventh

8 = Not applicable

9 = Not known: a validation error

X = Not known

Data cleaning	Rule 720

**HES field name**    **Delivery place (actual)**

Field	Delplace
-------	----------

Class	Maternity
-------	-----------

Length and format	1n
-------------------	----

Availability	
--------------	--

**Description**

This field contains a code which defines the actual type of delivery place (The intended delivery place is in delintn).

This item appears for each baby on multiple birth delivery records.

**Value**

0 = In NHS hospital: delivery facilities associated with midwife ward

1 = At a domestic address

2 = In NHS hospital: delivery facilities associated with consultant ward

3 = In NHS hospital: delivery facilities associated with GMP ward

4 = In NHS hospital: delivery facilities associated with consultant, GMP or midwife ward, or any combination of two of these

5 = In private hospital

6 = In other hospital or institution

7 = In NHS hospital: ward or unit without delivery facilities

8 = Other than those above

9 = Not known

Data cleaning	Rules 710 and 753
---------------	-------------------

**HES field name**    **Delivery place (intended)**

Field	delinten
-------	----------

Class	Maternity
-------	-----------

Length and format	1n
-------------------	----

Availability	
--------------	--

**Description**

This field contains a code which defines the intended type of delivery place. The initial intention is designated by the General Medical Practitioner (GMP) and midwife, or by the GMP and hospital staff.

The decision is normally made when the mother is assessed for delivery. The actual delivery place type is in delplac.

**Value**

0 = In NHS hospital: delivery facilities associated with midwife ward

1 = At a domestic address

2 = In NHS hospital: delivery facilities associated with consultant ward

3 = In NHS hospital: delivery facilities associated with GMP ward

4 = In NHS hospital: delivery facilities associated with consultant and GMP ward

5 = In private hospital

6 = In other hospital or institution

7 = In NHS hospital: ward or unit without delivery facilities

8 = Other than those above

9 = Not known

null = Not applicable (from 1990-91 to 1995-96)

----------------------	-------------------

**HES field name**    **First antenatal assessment date**

Field	anasdate
Class	Maternity
Length and format	dd/mm/yyyy (Date)
Availability	

**Description**

This field contains the date when a pregnant woman was first assessed and arrangements were made for antenatal care.

This is not necessarily the date when delivery arrangements were made.

**Value**

dd/mm/yyyy = Date of first antenatal assessment

null = Not applicable / not known

<b>Data cleaning</b>	None
----------------------	------

**HES field name**    **Gestation period in weeks at first antenatal assessment**

Field	anagest
Class	Maternity
Length and format	2nn
Availability	

**Description**

Gestation period in weeks at the date of the first antenatal assessment. This field is calculated from anadate, gestat and the dobbaby.

**Value**

2n = The gestation period in weeks

null = Not valid / not known

<b>Data cleaning</b>	Not applicable (derived by rule 790)
----------------------	--------------------------------------

**HES field name**   **Length of gestation**

Field	gestat
-------	--------

Class	Maternity
-------	-----------

Length and format	2n
-------------------	----

Availability	
--------------	--

**Description**

The fields contain the number of completed weeks of gestation according to the World Health Organization definition, which specifies time from the first day of the last menstrual period. If this date is not reliable, an estimate is provided.

This item appears for each baby on multiple birth delivery records.

**Value**

2n = Number of weeks in the range 10 to 49

99 = Not known: a validation error

Data cleaning	Rules 710 and 753
---------------	-------------------

**HES field name**   **Birth status**

Field	birstat
-------	---------

Class	Maternity
-------	-----------

Length and format	1n
-------------------	----

Availability	
--------------	--

**Description**

This field contains a code which indicates whether the baby was born alive or dead (still birth). A still birth is a birth after a gestation period of 24 weeks (168) days where the baby shows no sign of life when delivered.

This item appears for each baby on multiple birth delivery records.

**Value**

1 = Live

2 = Still birth: ante-partum

3 = Still birth: intra-partum

4 = Still birth: indeterminate

9 = Not known

Data cleaning	Rules 710 and 753

**HES field name    Labour / delivery onset method**

Field	delonset
-------	----------

Class	Maternity
-------	-----------

Length and format	1n
-------------------	----

Availability	
--------------	--

**Description**

This field contains a code which defines the method used to induce (initiate) labour, rather than to accelerate it.

**Value**

1 = Spontaneous: the onset of regular contractions whether or not preceded by spontaneous rupture of the membranes

2 = Any caesarean section carried out immediately following the onset of labour, when the decision was made before labour

3 = Surgical induction by amniotomy

4 = Medical induction, including the administration of agents either orally, intravenously or intravaginally with the intention of initiating labour

5 = Combination of surgical induction and medical induction

8 = Not applicable (from 1996-97 onwards)

9 = Not known: validation error

null = Not applicable (from 1990-91 to 1994-95)

Data cleaning	Rules 710 and 750

**HES field name**    **Mother's age at delivery**

Field	matage
-------	--------

Class	Maternity
-------	-----------

Length and format	3n
-------------------	----

Availability	
--------------	--

**Description**

This field contains the mother's age in whole years on the date of delivery. It is calculated from the mother's date of birth and the first baby's date of birth.

**Value**

3n = Age in years

null = Not valid

Data cleaning	Not applicable (derived by rule 810)
---------------	--------------------------------------

**HES field name**    **Mother's date of birth**

Field	motdob
-------	--------

Class	Maternity
-------	-----------

Length and format	dd/mm/yyyy (Date)
-------------------	-------------------

Availability	
--------------	--

**Description**

This field contains the mother's date of birth. It appears on birth records. The Mother's date of birth (motdob) field contains sensitive data.

Access to it requires the approval of the Database Monitoring Sub-Group (DMSG).

**Value**

dd/mm/yyyy = Mother's date of birth

Data cleaning	Rule 690
---------------	----------

**HES field name**    **Mother's data of birth check flag**

Field	motdob_cfl
-------	------------

Class	Maternity
-------	-----------

Length and format	1n
-------------------	----

Availability	
--------------	--

**Description**

Codes in this field validate the mother's date of birth (motdob).

**Value**

0 = Valid

1 = Missing

2 = Invalid

Data cleaning	Not applicable
---------------	----------------

**HES field name**   **Neonatel level of care**

Field	neocare
Class	Maternity
Length and format	1n
Availability	From 1996-97

**Description**

This field contains a code that defines the level of care given to a new born child. (Along with psychiatric patient status (admistat), this field replaces the V code indicator (vind).)

**Value**

0 = Normal care: care given by the mother or mother substitute, with medical and neonatal nursing advice if needed

1 = Special care: care given in a special nursery, transitional care ward or postnatal ward, which provides care and treatment exceeding normal routine care. Some aspects of special care can be undertaken by a mother supervised by qualified nursing staff. Special nursing care includes support for and education of the infant's parents

2 = Level 2 intensive care (high dependency intensive care): care given in an intensive or special care nursery, which provides continuous skilled supervision by qualified and specially trained nursing staff who may care for more babies than in level 1 intensive care. Care includes support for the infant's parents

3 = Level 1 intensive care (maximal intensive care): care given in an intensive or special care nursery, which provides continuous skilled supervision by qualified and specially trained nursing and medical staff. Care includes support for the infant's parents

8 = Not applicable: the episode of care does not involve a neonate at any time

9 = Not known: the episode of care involves a neonate and is finished but no data has been entered

this constitutes a validation error. Alternatively the episode involves a neonate but is unfinished, therefore no data need be present

<b>Data cleaning</b>	Rules 360 and 370
----------------------	-------------------

**HES field name**    **Number of babies**

Field	numbaby
-------	---------

Class	Maternity
-------	-----------

Length and format	1n or X
-------------------	---------

Availability	
--------------	--

**Description**

This field contains the number of babies delivered at the end of a single pregnancy. Both live and stillborn babies are counted. Until 2002-03, a maximum of 6 babies could be recorded in HES.

**Value**

1 = One

2 = Two

3 = Three

4 = Four

5 = Five

6 = Six or more

9 = Not known: a validation error

X = Not known

Data cleaning	Rules 710 and 750

Field	numtailb
-------	----------

Class	Maternity
-------	-----------

Length and format	1n
-------------------	----

Availability	
--------------	--

**Description**

This is the number of valid baby groups on the episode record. A valid baby group is defined as one which has a valid birthweight and a valid delivery method. This field defaults to 1.

**Value**

1n = Number of valid births associated with the episode record

Data cleaning	Rule 770
---------------	----------

**HES field name**    **Number of previous pregnancies**

Field	numpreg
-------	---------

Class	Maternity
-------	-----------

Length and format	2n
-------------------	----

Availability	
--------------	--

**Description**

This field contains the number of previous pregnancies that resulted in a registrable birth (live or still born). It appears on delivery records.

In practice, numpreg1 has often been filled with the 'Not known' code, and the remainder have been left blank.

**Value**

2n = Number of previous pregnancies, from 00 to 19, resulting in a registrable birth

99 = Not known

Data cleaning	Rule 750
---------------	----------

**HES field name**    **Postnatal stay**

Field	postdur
-------	---------

Class	Maternity
-------	-----------

Length and format	3n
-------------------	----

Availability	
--------------	--

**Description**

This derived field contains the number of days between the baby's birth and the end of the finished episode. It is calculated from episode end date (epiend) and the first baby's date of birth (dobbaby).

**Value**

3n = The number of days of stay, from 0 to 270

null = Not applicable / not known

Data cleaning	Not applicable (derived by rule 820)

**HES field name**    **Resuscitation method**

Field	biresus
-------	---------

Class	Maternity
-------	-----------

Length and format	1n
-------------------	----

Availability	
--------------	--

**Description**

This field contains a code that identifies the method used to get the baby breathing normally. This item appears for each baby on multiple birth delivery records.

**Value**

1 = Positive pressure nil, drugs nil

2 = Positive pressure nil, drugs administered

3 = Positive pressure by mask, drugs nil

4 = Positive pressure by mask, drugs administered

5 = Positive pressure by endotracheal tube, drugs nil

6 = Positive pressure by endotracheal tube, drugs administered

8 = Not applicable: still born and no method of resuscitation attempted

9 = Not known

Data cleaning	Rules 710 and 753
---------------	-------------------

**HES field name**   **Sex of baby**

Field	sexbaby
-------	---------

Class	Maternity
-------	-----------

Length and format	1n
-------------------	----

Availability	
--------------	--

**Description**

This field contains a code that defines the sex of the baby. This item appears for each baby on multiple birth delivery records.

**Value**

From 1996-97:

1 = Male

2 = Female

9 = Not specified

0 = Not known

Up to 1996-97:

1 = Male

2 = Female

3 = Indeterminate, including those undergoing sex change operations

Data cleaning	None
---------------	------

**HES field name**    **Status of person conducting delivery**

Field	delstat
-------	---------

Class	Maternity
-------	-----------

Length and format	1n
-------------------	----

Availability	
--------------	--

**Description**

This field normally provides the status of the person conducting the delivery. When a student delivers the baby, the code of the supervisor should be given.

This item appears for each baby on multiple birth delivery records.

**Value**

1 = Hospital doctor

2 = General practitioner

3 = Midwife

8 = Other than above

9 = Not known: validation error

Data cleaning	Rules 710 and 753

-------	---------

Class	Organisation
-------	--------------

Length and format	5an
-------------------	-----

Availability	
--------------	--

**Description**

This field contains a code for the organisation commissioning the patient's treatment. There are six main types of purchaser, the prevalence of each being dependent on the data year:

1. Health authorities
2. GP fund holders
3. Primary care groups
4. Primary care trusts
5. Private patients
6. Department of Health - the Department purchases treatment for patients from abroad (either under EU regulations or other reciprocal agreements) and for certain UK residents whose treatment is centrally financed, notably those treated by Special Health Authorities.

**Value**

Not available

Data cleaning	Rule 340

Length and format	1n
-------------------	----

Availability	From 1995-96
--------------	--------------

**Description**

A derived field that indicates whether the purchaser code (purcode) is one that is recognised throughout the NHS.

If not, the code may have been agreed locally between the hospital provider and the health care purchaser.

**Value**

0 = Purchaser code is not recognised throughout the NHS

1 = Purchaser code is recognised throughout the NHS

Data cleaning	Not applicable (derived by rule 1150)
---------------	---------------------------------------

**HES field name** Commissioner's regional office

Field	purro
Class	Organisation
Length and format	5an
Availability	From 1995-96 to 2001-02

**Description**

This field contains a code which identifies the Regional Office (RO) in which the purchaser is located. It is derived from the purcode field.

The current codes include those used in 1995-96 and those used subsequently. There were alterations to the codes from April 1996 and April 1999 to reflect changes in the regional organisation.

**Value**

From 1999-2000 to 2001-2002:

S or S0000 = Scotland  
W or W0000 = Wales  
Y01 = Northern and Yorkshire  
Y02 = Trent  
Y07 = West Midlands  
Y08 = North West  
Y09 = Eastern  
Y10 = London  
Y11 = South East  
Y12 = South West  
Z or Z0000 = Northern Ireland  
null = Not known

From 1996-97 to 1998-99:

S or S0000 = Scotland  
W or W0000 = Wales  
Y01 = Northern and Yorkshire  
Y02 = Trent  
Y03 = Anglia and Oxford  
Y04 = North Thames  
Y05 = South Thames  
Y06 = South and West  
Y07 = West Midlands  
Y08 = North West  
Z or Z0000 = Northern Ireland  
null = Not known  
9999 = Not known

1995-96:

A0000 = Northern  
B0000 = Yorkshire  
C0000 = Trent  
D0000 = East Anglia  
E0000 = North West Thames

F0000 = North East Thames  
G0000 = South East Thames

**HES field name**   **Primary care trust area where patient's GP was registered**

Field	gpprpct
Class	Organisation
Length and format	3an
Availability	From 1997-98

**Description**

This field gives details of the primary care trust area in which the patient's GP is registered.

**Value**

nan, naa or aaa = Primary care trust where patient's GP was registered

59898 = Not applicable

59999 = Unknown

<b>Data cleaning</b>	Not applicable (derived by rule 1125)
----------------------	---------------------------------------

**HES field name**   **Primary care trust of responsibility**

Field	pctcode
Class	Organisation
Length and format	3an
Availability	From 1997-98 to 2005-06

**Description**

A derived field providing the primary care trust responsible for the patient. Commissioning responsibility for individual patients rests with the primary care trust (PCT) with whom the patient is registered.

This means that patients with a GP in one PCT area may reside in a neighbouring or other area but remain the responsibility of the PCT with whom their GP of registration is associated.

PCTs are also responsible for non-registered patients who are resident within their boundaries.

**Value**

nan, naa or aaa = Primary care trust

**HES field name**    **Provider code**

Field	procodet
-------	----------

Class	Organisation
-------	--------------

Length and format	5an
-------------------	-----

Availability	
--------------	--

**Description**

This field gives a combination of 3-character and 5-character provider codes.

Procodet enables you to view a combined list of codes, and related data, from:

1. Primary care trusts (3 character, beginning with 5)
2. NHS trusts (3 character, beginning with R. Trusts with associated treatment centres will have an ' - X' following their code)
3. NHS trust treatment centres (5 character listed separately to the NHS trusts)
4. Independent providers (5 character, beginning with 8)
5. Independent sector healthcare providers (5 character, beginning with N)

For 3-character codes only see procode (provider code - 3 character) and for 5-character codes only see procode (provider code).

**Value**

5an = Provider code

**Data cleaning**

**HES field name**    **Provider code - 3 character**

Field	procode3
Class	Organisation
Length and format	3an
Availability	

**Description**

A provider code is a unique code that identifies an organisation acting as a health care provider.

The code is managed by the National Administrative Codes Service (NACS) and supports the identification of organisations exchanging information within the NHS.

Procode3 contains only the first three characters (the organisation code) and can be used to identify an individual provider (eg NHS Trust or PCT).

**Value**

3an = 3-character provider code

**Data cleaning****HES field name**    **Provider code - 5 character**

Field	procode
Class	Organisation
Length and format	5an

Description
-------------

Many NHS hospitals have private wards where private patients may use the accommodation and services of the hospital provider.

Some hospitals also provide amenity beds, usually located in small side wards for which a charge is made for the accommodation.

Both of these categories of patient are defined by the NHS Act of 1977. Any categories of patient, whether NHS, private or amenity patients, can be formally detained under the provisions of the Mental Health Act 1983 and other legislation.

Most patients in NHS hospitals or hospital units will come under category 10 (see below).

Value
-------

10 = NHS patient: not formally detained

11 = NHS patient: formally detained under Part II of the Mental Health Act 1983

12 = NHS patient: formally detained under Part III of the Mental Health Act 1983 or under other Acts

13 = NHS patient: formally detained under part X, Mental Health Act 1983\*

20 = Private patient: not formally detained

21 = Private patient: formally detained under Part II of the Mental Health Act 1983

22 = Private patient: formally detained under Part III of the Mental Health Act 1983 or under other Acts

23 = Private patient: formally detained under part X, Mental health Act 1983\*

30 = Amenity patient: not formally detained

31 = Amenity patient: formally detained under Part II of the Mental Health Act 1983

32 = Amenity patient: formally detained under Part III of the Mental Health Act 1983 or under other Acts

33 = Amenity patient: formally detained under part X, Mental health Act 1983\*

null = Other maternity event.

\* Codes 13, 23 and 33 were introduced at the start of the 1994-95 HES year (1 April 1995)

---------------	------

HES field name	Ethnic category
Field	ethnos
Class	Patient
Length and format	1n or X
Availability	
Description	

This field contains a code that specifies some ethnic groups and some nationalities. It was introduced from the 1995-96 data year.

From April 2001 the codes were changed to conform to the 2001 census classification. However, HES continued to accept the old codes as well as the new codes for the 2001-02 and 2002-03 data years.

Ethnic Category has been mandatory for Admitted Patient Care Commissioning Dataset central returns since 1995. However birth episodes, and other CDS types have been optional.

From April 2009 Ethnic Category will be mandatory for all CDS types. I.e. to include: birth episodes; unfinished birth episodes; other birth event types; Out Patient CDSs and Accident and Emergency CDSs.

Note: 'Z – not stated' means that the person had been asked and had declined either refusing to provide this information, or a genuine inability to choose. 'X – Not known' means that the person has not been asked or the patient was not in a condition to be asked. E.g. unconscious.

#### Value

From 2001-02 onwards:

A = British (White)

B = Irish (White)

C = Any other White background

D = White and Black Caribbean (Mixed)

E = White and Black African (Mixed)

F = White and Asian (Mixed)

G = Any other Mixed background

H = Indian (Asian or Asian British)

J = Pakistani (Asian or Asian British)

K = Bangladeshi (Asian or Asian British)

L = Any other Asian background

M = Caribbean (Black or Black British)

N = African (Black or Black British)

Data cleaning	Not applicable
---------------	----------------

**HES field name**    **Postcode district of patient's residence**

Field	postdist
-------	----------

Class	Patient
-------	---------

Length and format	4an
-------------------	-----

Availability	
--------------	--

**Description**

Contains the outward portion of the patient's postcode (ie all characters to the left of the space).

The code ZZ99 indicates the postcode was either unavailable, or that the patient did not have one (eg because they were normally resident abroad).

**Value**

4an = Postcode district

ZZ99 = Unavailable / not applicable

Data cleaning	Not applicable (derived from homeadd by rule 1200)
---------------	--

**HES field name**    **Postcode of patient**

Field	homeadd
-------	---------

Class	Patient
-------	---------

Length and format	8an
-------------------	-----

Availability	
--------------	--

**Description**

This field normally contains the patient's home postcode. However, if a patient is away from home for long periods, such as in a university hall of residence, the postcode of their typical residence is used instead. If the postcode contains fewer than eight characters, spaces are placed between the two parts of the postcode so that the second part always starts at the sixth character position.

The Postcode of patient (homeadd) field contains sensitive data. Access to it requires the approval of the Database Monitoring Sub-Group (DMSG).

**Value**

aann naa = Postcode

ZZ99 3CZ = England, GB, UK (not otherwise stated)

ZZ99 3VZ = No fixed abode

ZZ99 3WZ = Not known + sundry categories

ZZ99 2WZ = Northern Ireland

ZZ99 1WZ = Scotland

ZZ99 3GZ = Wales

ZZ99 NNN = Other pseudo codes used for patients normally resident abroad (where NNN is the country code listed in the NHS postcode directory)

Data cleaning	Rule 330
---------------	----------

**HES field name**   **Sex of patient**

Field	sex
-------	-----

Class	Patient
-------	---------

Length and format	1n
-------------------	----

Availability	
--------------	--

**Description**

This field contains a code which defines the sex of the patient.

**Value**

From 1996-97 onwards:

1 = Male

2 = Female

9 = Not specified

0 = Not known

Prior to April 1996:

1 = Male

2 = Female

3 = Indeterminate, including those undergoing sex change operations

<b>Data cleaning</b>	Rules 50, 60 and 650

## Patient pathway

Duration of elective wait (waitdays)	153
Earliest reasonable date offered (earldatoff)	153
Organisation code (patient pathway identifier issuer) (orgpppid)	154
Patient pathway identifier (patpathid)	154
RTT period start date (rttperstart)	155
RTT period status (rttperstat)	156
RTT period end date (rttperend)	157
Unique booking reference number (bookrefno)	157

**HES field name**    **Duration of elective wait**

Field	waitdays
Class	Patient Pathway
Length and format	4n
Availability	2007-08, Quarter 3 onwards

**Description**

The number of days that a patient waited from the date when a decision was taken for treatment to when they received the treatment.

**Value**

4n = duration of elective wait

9998 = Not applicable

9999 = Not known

<b>Data cleaning</b>	Not applicable: derived field
----------------------	-------------------------------

**HES field name**    **Earliest reasonable date offered**

Field	earldatoff
Class	Patient Pathway
Length and format	dd/mm/yyyy (Date)
Availability	2007-08, Quarter 3 onwards

**Description**

The earliest reasonable (as defined by hospital staff where a patient accepts an offer date the date is deemed reasonable) appointment or admission date offered.

Where a patient cancels an appointment or offer for admission, the earliest reasonable offer date for the rearranged appointment/admission will remain as the earliest reasonable offer date of the cancelled appointment/admission.

Where the healthcare provider cancels and rearrange an appointment/admission date, the earliest reasonable offer date for the re-arranged appointment/admission will be the date of the earliest reasonable offer made following cancellation.

**Value**

dd/mm/yyyy = earliest reasonable date offered

<b>Data cleaning</b>	Data not cleaned
----------------------	------------------

**HES field name      Organisation code (patient pathway ID issuer)**

Field	orgpppid
Class	Patient Pathway
Length and format	5an
Availability	2007-08, Quarter 3 onwards

**Description**

The organisation code of the patient pathway ID issuer.

Where Choose and Book has been used, the Organisation Code for NHS Connecting For Health (X09) is used.

**Value**

5an = organisation code

<b>Data cleaning</b>	Data not cleaned
----------------------	------------------

**HES field name      Patient pathway ID**

Field	Patpathid
Class	Patient Pathway
Length and format	20an
Availability	2007-08, Quarter 3 onwards

**Description**

A code that, when combined with the organisation code of either the issuer or the organisation receiving the service request, identifies a patient's pathway.

For example, the Unique Booking Reference Number of the first referral and X09 (the organisation code for NHS Connecting for Health).

**Value**

20an = patient pathway identifier

<b>Data cleaning</b>	Data not cleaned
----------------------	------------------

**HES field name** **RTT period start date**

Field	rttperstart
-------	-------------

Class	Patient Pathway
-------	-----------------

Length and format	dd/mm/yyyy (Date)
-------------------	-------------------

Availability	From 2007-08, Quarter 3 onwards
--------------	---------------------------------

**Description**

The start date, for the referral to treatment period.

**Value**

dd/mm/yyyy = RTT period start date

Data cleaning	Data not cleaned
---------------	------------------

HES field name	RTT period status
Field	rttperstat
Class	Patient Pathway
Length and format	2n
Availability	From 2007-08, Quarter 3 onwards
Description	
The status of an activity, or anticipated activity, for the referral to treatment period.	
Value	
The first activity in a referral to treatment period:	
10 - First activity	
11 - End of active monitoring	
12 - Consultant referral	
Subsequent activity during a referral to treatment period:	
20 - subsequent activity. Further activities anticipated	
21 - Transfer to another healthcare provider	
Activity that ends a referral to treatment period:	
30 - First treatment - the start of the first treatment that's intended to manage a patient's disease, condition or injury.	
31 - Start of active monitoring, initiated by the patient	
32 - Start of active monitoring, initiated by the care professional	
33 - Failure to attend the first care activity after referral	
34 - Decision not to treat or not further contact required	
35 - Patient decline offered treatment	
36 - Patient died before treatment	
Activity that is not part of a referral to treatment period:	
90 - After treatment - first treatment occurred previously, eg admitted as an emergency from A&E91 - Active monitoring (the patient is observed but not treated)	
92 - Not yet referred	
98 - Not applicable	
Activity where the referral to treatment period status is not yet known: 99 - Not yet known	
Data cleaning	Data not cleaned

**HES field name**   **RTT period end date**

Field	rttperend
Class	Patient Pathway
Length and format	dd/mm/yyyy (Date)
Availability	From 2007-08, Quarter 3 onwards

**Description**

The end date, for the referral to treatment period.

**Value**

dd/mm/yyyy = RTT period end date

Data cleaning	Data not cleaned
---------------	------------------

**HES field name**   **Unique booking reference number**

Field	bookrefno
Class	Patient Pathway
Length and format	12n
Availability	2007-08, Quarter 3 onwards

**Description**

The booking reference number assigned by the Connecting for Health Choose and Book System when a patient accepts an appointment date, regardless of whether they subsequently attend or cancel the appointment. Each booking reference number is unique.

**Value**

12n = unique booking reference number

Data cleaning	Data not cleaned

HES field name	Treatment specialty
----------------	---------------------

Field	tretspef
-------	----------

Class	Period of care
-------	----------------

Length and format	3n or &
-------------------	---------

Availability	
--------------	--

Description
-------------

This field contains a code that defines the specialty in which the consultant was working during the period of care. It can be compared with mainspef, the specialty under which the consultant is contracted.

Prior to 1 April 1996, this data item contained the code for the sub-specialty (subspef).

From April 2004 a new list of treatment specialities was introduced (see below). The new list describes the specialised service within which the patient was treated.

Value
-------

From 1 April 2004:

100 = General surgery  
 101 = Urology  
 102 = Transplantation surgery (includes renal and liver transplants, excludes cardiothoracic transplantation)  
 103 = Breast surgery (includes suspected neoplasms, cysts etc, does not include cosmetic surgery)  
 104 = Colorectal surgery (surgical treatment of disorders of the lower intestine - colon, anus and rectum)  
 105 = Hepatobiliary & pancreatic surgery (includes liver surgery but excludes liver transplantation see transplantation surgery)  
 106 = Upper gastrointestinal surgery  
 107 = Vascular surgery  
 110 = Trauma & orthopaedics  
 120 = Ear, nose and throat (ENT)  
 130 = Ophthalmology  
 140 = Oral surgery  
 141 = Restorative dentistry (endodontics, periodontics and prosthodontics)  
 142 = Paediatric dentistry  
 143 = Orthodontics  
 144 = Maxillo-facial surgery  
 150 = Neurosurgery  
 160 = Plastic surgery  
 161 = Burns care (recognised specialist services only - includes 'outreach' facilities)  
 170 = Cardiothoracic surgery (where there are no separate services for cardiac and thoracic surgery)  
 171 = Paediatric surgery  
 172 = Cardiac surgery  
 173 = Thoracic surgery  
 174 = Cardiothoracic transplantation (recognised specialist services only - includes 'outreach' facilities)  
 180 = Accident & emergency (A&E)  
 190 = Not a treatment function  
 191 = Pain management (complex pain disorders requiring diagnosis and treatment by a specialist multi-professional team)  
 192 = Critical care medicine (also known as intensive care medicine)

199 = Non-UK Provider - specialty function not known, treatment mainly surgical  
211 = Paediatric Urology (from 2006-07)  
212 = Paediatric Transplantation Surgery (from 2006-07)  
213 = Paediatric Gastrointestinal Surgery (from 2006-07)  
214 = Paediatric Trauma and Orthopaedics (from 2006-07)  
215 = Paediatric Ear Nose and Throat (from 2006-07)  
216 = Paediatric Ophthalmology (from 2006-07)  
217 = Paediatric Maxillo-Facial Surgery (from 2006-07)  
218 = Paediatric Neurosurgery (from 2006-07)  
219 = Paediatric Plastic Surgery (from 2006-07)  
220 = Paediatric Burns Care (from 2006-07)  
221 = Paediatric Cardiac Surgery (from 2006-07)  
222 = Paediatric Thoracic Surgery (from 2006-07)  
241 = Paediatric Pain Management (from 2006-07)  
242 = Paediatric Intensive Care (from 2006-07)  
251 = Paediatric Gastroenterology (from 2006-07)  
252 = Paediatric Endocrinology (from 2006-07)  
253 = Paediatric Clinical Haematology (from 2006-07)  
254 = Paediatric Audiological Medicine (from 2006-07)  
255 = Paediatric Clinical Immunology and Allergy (from 2006-07)  
256 = Paediatric Infectious diseases (from 2006-07)

HES field name	Date of discharge
----------------	-------------------

Field	disdate
-------	---------

Class	Period of care
-------	----------------

Length and format	dd/mm/yyyy (Date)
-------------------	-------------------

Availability	All years
--------------	-----------

Description
-------------

This field contains the date on which the patient was discharged from hospital.  
It is only present in the record for the last episode of a spell.

Value
-------

dd/mm/yyyy = Date

null = Date not known / not applicable

Data cleaning	Rules 205, 210, 220 and 223
---------------	-----------------------------

HES field name	Destination on discharge
----------------	--------------------------

Field	disdest
-------	---------

Class	Period of care
-------	----------------

Length and format	2n
-------------------	----

Availability	
--------------	--

Description
-------------

This field contains a code which identifies where the patient was due to go on leaving hospital. In most cases they return home.

For many patients discharge destination is the same as source of admission (admisorc).

Value
-------

19 = The usual place of residence, including no fixed abode

29 = Temporary place of residence when usually resident elsewhere, for example, hotels and residential educational establishments

30 = Repatriation from high security psychiatric hospital (from 1999-2000)

37 = Penal establishment - court (from 1999-2000)

38 = Penal establishment - police station (from 1999-2000)

39 = Penal establishment - court and police station excluded (from 1999-2000)

48 = High security psychiatric hospital, Scotland (from 1999-2000)

49 = NHS other hospital provider - high security psychiatric accommodation

50 = NHS other hospital provider - medium secure unit (from 1999-2000)

51 = NHS other hospital provider - ward for general patients or the younger physically disabled

52 = NHS other hospital provider - ward for maternity patients or neonates

53 = NHS other hospital provider - ward for patients who are mentally ill or have learning disabilities

54 = NHS run nursing home, residential care home or group home

65 = Local authority Part 3 residential accommodation - where care is provided (from 1996-97)

66 = Local authority foster care, but not in Part 3 residential accommodation - where care is provided (from 1996-97)

69 = LA home or care (1989-90 to 1995-96)

79 = Not applicable - patient died or still birth

84 = Non-NHS run hospital - medium secure unit (from 2003-04)

85 = Non-NHS (other than local authority) run residential care home (from 1996-97 to 2003-04)

85 = Non-NHS (other than local authority) run care home (from 2003-04)

86 = Non-NHS (other than local authority) run nursing home (from 1996-97 to 2003-04)

87 = Non-NHS run hospital

88 = Non-NHS (other than local authority) run hospice

89 = Non-NHS institution (1989-90 to 1995-96)

98 = Not applicable

99 = Not known

**HES field name**    **Method of discharge**

Field	dismeth
Class	Period of care
Length and format	1n
Availability	

**Description**

This field contains a code which defines the circumstances under which a patient left hospital. For the majority of patients this is when they are discharged by the consultant.

This field is only completed for the last episode in a spell.

**Value**

- 1 = Discharged on clinical advice or with clinical consent
- 2 = Self discharged, or discharged by a relative or advocate
- 3 = Discharged by a mental health review tribunal, the Home Secretary or a court
- 4 = Died
- 5 = Baby was still born
- 8 = Not applicable: patient still in hospital
- 9 = Not known: a validation error

<b>Data cleaning</b>	Rules 205, 210, 220, 223 and 320
----------------------	----------------------------------

**HES field name**    **Bed days within the year**

Field	bedyear
Class	Period of care
Length and format	3n
Availability	All years

**Description**

This derived field provides the duration of an episode in days within the HES data year. It is derived from epistart (episode start date) and epiend (episode end date).

For episodes that both start and finish in the data year, bedyear has the same value as epidur (episode duration).

If the episode is unfinished, bedyear is calculated from epistart and the end of the data year.

If epistart is before the beginning of the data year, bedyear is calculated from the start of the data year and epiend.

If the record type is other maternity events (episode type 5 or 6), bedyear is null.

**Value**

3n = The number of days of stay from 0 to 366

null = Not applicable (other maternity event / not known)

<b>Data cleaning</b>	Not applicable (derived by rule 240)
----------------------	--------------------------------------

**HES field name**    **Beginning of spell**

Field	spelbgin
-------	----------

Class	Period of care
-------	----------------

Length and format	1n
-------------------	----

Availability	
--------------	--

**Description**

This derived field contains a code that defines whether the episode is the first of a spell and whether the spell started in the current or previous year. Other maternity events are excluded.

**Value**

0 = Not first episode of spell

1 = First episode of spell that started in previous year

2 = First episode of spell that started in current year

null = Not applicable

Data cleaning	Not applicable (derived by rule 1170)
---------------	---------------------------------------

**HES field name**    **Date episode ended**

Field	epiend
-------	--------

Class	Period of care
-------	----------------

Length and format	dd/mm/yyyy (Date)
-------------------	-------------------

Availability	
--------------	--

**Description**

This field contains the date on which a patient left the care of a particular consultant, for one of the following reasons:

Discharged from hospital (includes transfers) or moved to the care of another consultant.

A null entry either indicates that the episode was unfinished at the end of the data year, or the date was unknown.

**Value**

dd/mm/yyyy = Date episode ended

null = Not applicable / not known

Data cleaning	Rules 190, 200 and 203
---------------	------------------------

**HES field name**    **Date episode started**

Field	epistart
Class	Period of care
Length and format	dd/mm/yyyy (Date)
Availability	

**Description**

This field contains the date on which a patient was under the care of a particular consultant. If a patient has more than one episode in a spell, for each new episode there is a new value of epistart.

However, the admission date which is copied to each new episode in a spell will remain unchanged and will be equal to the episode start date of the first episode in hospital.

**Value**

dd/mm/yyyy = Date episode started

null = Not applicable / not known

<b>Data cleaning</b>	Rule 30
----------------------	---------

**HES field name**    **Duration of spell**

Field	speldur
Class	Period of care
Length and format	5n
Availability	

**Description**

This derived field contains the difference in days between the admission date (admidate) and the discharge date (epiend) provided the discharge method (dismeth) confirms that the spell has finished.

If the episode has not finished it is calculated from the end of the year and admidate.

**Value**

5n = Duration of spell in days from 0 to 29,200

null = Not applicable: patient not discharged (dismeth not in range 1-5), other maternity event (epitype is 5 or 6) or not valid

<b>Data cleaning</b>	Not applicable (derived by rule 1180)
----------------------	---------------------------------------

**HES field name**    **End of spell**

Field	spelend
Class	Period of care
Length and format	1a
Availability	

**Description**

This field contains a code which defines whether the episode is the last of a spell.

It is set for finished episodes (episode status - epistat - is 3) for general, delivery or birth episodes (episode type - epitype - is 1, 2 or 3) provided the discharge method (dismeth) confirms that the spell has finished.

**Value**

Y = Last episode of spell

N = Not last episode of spell

<b>Data cleaning</b>	Not applicable (derived by rule 1190)
----------------------	---------------------------------------

**HES field name**    **Episode duration**

Field	epidur
Class	Period of care
Length and format	5n
Availability	

**Description**

This field contains the difference in days between the episode start date (epistart) and the episode end date (epiend).

If the episode is unfinished epidur is set as null.

**Value**

5n = Duration of episode in days from 0 to 29,200

null = Not applicable (other maternity event or not known)

<b>Data cleaning</b>	Not applicable (derived by rule 250)
----------------------	--------------------------------------

**HES field name**   **Episode order**

Field	epiorder
-------	----------

Class	Period of care
-------	----------------

Length and format	2n
-------------------	----

Availability	
--------------	--

**Description**

This field contains the number of the episode within the current spell.

All spells start with an episode where epiorder is 01.

Many spells finish with this episode, but if the patient moves to the care of another consultant, a new episode begins.

Episode numbers increase by 1 for each new episode until the patient is discharged (this includes transfers to another NHS trust or primary care trust - ie the first episode in the new trust will have epiorder 01).

If the same patient returns for a different spell in hospital, epiorder is again set to 01.

Admissions are calculated by counting the number of times epiorder is 01.

When studying long term care, remember that it is not unusual to transfer psychiatric patients from one hospital to another.

**Value**

2n = The number of the episode in the sequence of episodes from 01-87

98 = Not applicable

99 = Not known

null = Not applicable: other maternity event

Data cleaning	Rules 130, 140 and 320
---------------	------------------------

**HES field name**    **Episode start date check flag**

Field	epis_cfl
Class	Period of care
Length and format	1n
Availability	

**Description**

This field validates the episode start date (epistart).

**Value**

0 = Valid (or missing because not required)  
1 = Missing  
2 = Invalid

<b>Data cleaning</b>	Not applicable (derived by rule 30)
----------------------	-------------------------------------

**HES field name**    **Episode status**

Field	epistat
Class	Period of care
Length and format	1n
Availability	

**Description**

This field tells you whether the episode had finished before the end of the HES data-year (ie whether the episode was still 'live' at midnight on 31 March).

For example, if a patient was admitted on 25 March 2005 and was not discharged (or transferred to the care of another consultant) until 4 April 2005, there will be a record describing the unfinished episode (episode status = 1) in the 2004-05 data, and a separate record describing the finished episode (episode status = 3) in the 2005-06 data.

Because hospital providers are advised not to include clinical data (diagnosis and operation codes) in unfinished records, these are normally excluded from analyses.

Also, if unfinished episodes are included in time series analyses - where data for more than one year is involved - there is a danger of counting the same episode twice.

**Value**

1 = Unfinished  
3 = Finished  
9 = Derived unfinished (not present on processed data)

<b>Data cleaning</b>	Rules 170 & 180
----------------------	-----------------

**HES field name**   **Episode type**

Field	epitype
Class	Period of care
Length and format	1n
Availability	

**Description**

This field contains a code that defines the type of episode, so that groups of similar episodes can be formed.

**Value**

- 1 = General episode (anything that is not covered by the other codes)
- 2 = Delivery episode
- 3 = Birth episode
- 4 = Formally detained under the provisions of mental health legislation or long-term (over one year) psychiatric patients who should have additional information recorded on the psychiatric census. This value can only appear in unfinished records
- 5 = Other delivery event
- 6 = Other birth event

<b>Data cleaning</b>	Rules 150 & 160
----------------------	-----------------

**HES field name**   **Hospital provider spell number**

Field	provspno
Class	Period of care
Length and format	12an
Availability	From 1997-98

**Description**

Hospital provider spell number. A number to provide a unique identifier for each Hospital Provider Spell for a health care provider.

**Value**

Not available

<b>Data cleaning</b>	None

**HES field name**    **Age at psychiatric census date**

Field    censage

Class    Psychiatric

Length and format    3n

Availability

**Description**

This field is calculated from date of birth (dob) and the date of the psychiatric census (31 March every year).

It is only calculated for psychiatric census records if the episode type is not for a formally detained patient (epitype is not 4) or one that was admitted more than one year previously, censage is null. The maximum permitted value is 120 years.

**Value**

3n = Age in years from 1 to 119 on the date of the annual psychiatric census

120 = 120 years or more on the date of the annual psychiatric census

null = Not applicable (epitype is not 4) / not known

Data cleaning    Not applicable (derived by rule 880)

**HES field name**    **Carer support indicator**

Field    carersi

Class    Psychiatric

Length and format    2n

Availability    From 1997-98

**Description**

This field contains a code which states whether carer support is available to the patient at home or other normal residence.

This does not include any paid support or support from a voluntary organisation unless the patient is normally resident in a nursing home, group home or residential care home.

**Value**

01 = Yes

02 = No

99 = Not known

Data cleaning    Rule 400

**HES field name**    **Date detention commenced**

Field	detndate
Class	Psychiatric
Length and format	dd/mm/yyyy (Date)
Availability	

**Description**

For patients under a detention order at the date of the census, this field contains the date at which the first order commenced in the current continuous period of detention.

Where the detention order is held by a hospital other than where the patient is at the date of the census, the latter is responsible for obtaining information relating to the detention order, and submitting the data.

**Value**

dd/mm/yyyy = Date detention commenced

null = Not known / not applicable

<b>Data cleaning</b>	Rule 110
----------------------	----------

**HES field name**    **Date detention commenced check flag**

Field	det_cfl
Class	Psychiatric
Length and format	1n
Availability	

**Description**

Validation of date detention commenced.

**Value**

0 = Valid (or missing because not required)

1 = Missing

2 = Invalid

<b>Data cleaning</b>	Not applicable (derived by rule 110)
----------------------	--------------------------------------

**HES field name    Detention category**

Field	detncat
Class	Psychiatric
Length and format	1n
Availability	From 1999-00

**Description**

Indicates the legislation under which the patient was detained.

The detention category (detncat) field contains sensitive data. Access to it requires the approval of the Database Monitoring Sub-Group (DMSG).

**Value**

0 = Informal, not formally detained

1 = Formally detained under Part II, Mental Health Act 1983

2 = Formally detained under Part III, Mental Health Act 1983, and other legislation

3 = Formally detained under Part X, Mental Health Act 1983

<b>Data cleaning</b>	Not applicable
----------------------	----------------

**HES field name    Duration of care to psychiatric census date**

Field	cendur
Class	Psychiatric
Length and format	5n
Availability	

**Description**

Duration of care in days to the psychiatric census date.

This field is calculated from admidate (admission date) and the date of the psychiatric census (31 March every year). The maximum permitted value is 29,200 days (approximately 80 years).

**Value**

5n = Duration of stay in days at census date from 0 to 29,200

null = Not applicable (epitype is not 4) / not known

<b>Data cleaning</b>	Not applicable (derived by rule 870)
----------------------	--------------------------------------

**HES field name**    **Duration of detention**

Field	detdur
-------	--------

Class	Psychiatric
-------	-------------

Length and format	5n
-------------------	----

Availability	
--------------	--

**Description**

This derived field contains the number of days between the date the current detention commenced (detndate) and the date of the psychiatric census (31 March of cendate).

The maximum period is 29,200 days (approximately 80 years).

**Value**

5n = Duration of detention in days at census date from 0 to 29,200

null = Not applicable (epitype is not 4) / not known

Data cleaning	Not applicable (derived by rule 890)
---------------	--------------------------------------

**HES field name    Legal group of patient**

Field	legalgpa
Class	Psychiatric
Length and format	1n
Availability	From 2002-03

**Description**

This field contains a code that allocates the legal status of a patient to one of eight groups. (An aggregation of legal status of a patient on admission, leglcat.)

The legal group of patient (legalgpa) field contains sensitive data. Access to it requires the approval of the Database Monitoring Sub-Group (DMSG).

**Value**

0 = Not formally detained (Leglcat is 01 or spaces)

1 = Formally detained under Part II, Sections 2 to 34 of the Mental Health Act 1983 (Leglcat is 02 to 06, or 2 to 6)

2 = Formally detained under Part III, Sections 35 to 55 of the Mental Health Act 1983, or previous legislation (Leglcat is 07 to 18, 30 to 32, 34 or 7 to 9)

3 = Formally detained under Part X, Sections 131 to 149 of the Mental Health Act 1983 (Leglcat is 19 or 20)

4 = Supervised discharge under the Mental Health Act 1995 (Leglcat is 33)

5 = Guardianship (Sections 7 & 37) under the Mental Health Act 1983 (Leglcat is 35 or 36)

Not applicable = ie home births/deliveries where epitype is 5 or 6

Not known = any other value for leglcat

<b>Data cleaning</b>	Not applicable (derived by rule 1135)
----------------------	---------------------------------------

**HES field name**    **Legal group of patient (psychiatric)**

Field	legalgpc
Class	Psychiatric
Length and format	1n
Availability	From 2002-03

**Description**

Legal group of patient, an aggregation of legal status of a patient on psychiatric census date, leglstat.

This field contains a code that allocates the legal status of a patient to one of eight groups.

This field contains sensitive data. Access to it requires the approval of the Database Monitoring Sub-Group (DMSG).

**Value**

- 0 = Legal status on psychiatric census date is not formally detained, leglstat = 01 or spaces
- 1 = Legal status on psychiatric census date, leglstat = 02-06 or space2-space6: Formally detained under Part II (Section 2-34) of the Mental Health Act 1983
- 2 = Legal status on admission, leglcat = 07-18, 30-32, 34 or space7-space9: Formally detained under Part III (Section 35-55) of the Mental Health Act 1983, or previous legislation
- 3 = Legal status on admission, leglcat = 19-20: Formally detained under Part X (Sections 131-149) of the Mental Health Act 1983
- 4 = Legal status on admission, leglcat = 33: Supervised discharge under the Mental Health Act 1995
- 5 = Legal status on admission, leglcat = 35, 36: Guardianship (Sections 7 & 37) under the Mental Health Act 1983
- 8 = Not applicable ie home births/deliveries, where epitype = 5/6
- 10 = Not known: any other value for leglstat.

<b>Data cleaning</b>	Not applicable (derived by rule 895)

**HES field name**    **Marital status (psychiatric)**

Field	marstat
-------	---------

Class	Psychiatric
-------	-------------

Length and format	1an
-------------------	-----

Availability	
--------------	--

**Description**

This field contains a code that defines a patient's marital status where the consultant's specialty (mainspef) is one of the psychiatric specialties.

Although the numerical codes were retired on 1/10/2006, these are still flowing so both sets of codes are seen.

**Value**

8 = Not applicable.

From 1/10/2006 onwards:

S = Single

M = Married/Civil Partner

D = Divorced/Person whose Civil Partnership has been dissolved

W = Widowed/Surviving Civil Partner

P = Separated

N = Not disclosed.

Prior to 1/10/2006:

1 = Single

2 = Married, including separated

3 = Divorced

4 = Widowed

9 = Not known

---------------	----------

**HES field name**    **Mental category**

Field	mentcat
-------	---------

Class	Psychiatric
-------	-------------

Length and format	1n
-------------------	----

Availability	
--------------	--

**Description**

This field contains a code which defines the mental categories of a patient in accordance with the designations in the Mental Health Act 1983.

A patient should be included in only one mental category. If a patient has been assigned to more than one mental category, mental illness takes precedence over the others, and mental impairment or severe mental impairment takes precedence over psychopathic disorder.

**Value**

1 = Mental illness

2 = Mental impairment

3 = Severe mental impairment

4 = Psychopathic disorder

5 = Other (from 1995-96)

8 = Not applicable

9 = Not known

Data cleaning	None
---------------	------

**HES field name    Psychiatric history on admission**

Field	admistat
Class	Psychiatric
Length and format	1n
Availability	From 1996-97

**Description**

This field contains a code which identifies previous psychiatric care for psychiatric patients.

It applies only to patients admitted or transferred to a consultant in one of the psychiatric specialties during a spell in hospital. It is recorded for the first such consultant episode but not for subsequent psychiatric consultant episodes or any non-psychiatric episodes.

This field is used to indicate the turnover for psychiatric patients, and identify first time psychiatric admissions and re-admissions. Where a patient has a history of admission to several hospital providers, priority is given to the current hospital provider (code 1), regardless of whether the preceding admission was to the same hospital provider.

This field replaces special (UK NHS specific) diagnosis codes commencing U69 (1 April 1989 to 31 March 1995) and U51 (1 April 1995 to 31 March 1996), and also the HES derived V code indicator data item.

**Value**

0 = No known previous hospital provider spell with a consultant episode having a psychiatric specialty within any health care provider

1 = One or more previous hospital provider spells with a consultant episode having a psychiatric specialty within this health care provider

2 = One or more previous hospital provider spells with a consultant episode having a psychiatric specialty within another health care provider, but none with this healthcare provider

8 = Not applicable: the patient is not receiving admitted patient care under a consultant in a psychiatric specialty

9 = Not known: the patient is receiving admitted patient care under a consultant in a psychiatric specialty but the information is not available. This constitutes a validation error

**HES field name**    **CDS extract date**

Field	cdsextdate
Class	System
Length and format	dd/mm/yyyy (Date)
Availability	2007-08, Quarter 3 onwards

**Description**

CDS extract date.

**Value**

dd/mm/yyyy

Data cleaning	Data not cleaned
---------------	------------------

**HES field name**    **CDS version number**

Field	cdsversion
Class	System
Length and format	6an
Availability	2007-08, Quarter 3 onwards

**Description**

The version of the commissioning data set (CDS) being used.

**Value**

6an = CDS version number

Data cleaning	Data not cleaned
---------------	------------------

**HES field name**    **CDS protocol identifier**

Field	cdsverprotid
-------	--------------

Class	System
-------	--------

Length and format	3an
-------------------	-----

Availability	2007-08, Quarter 3 onwards
--------------	----------------------------

**Description**

CDS Protocol ID.

**Value**

3an = CDS Protocol Identifier

Data cleaning	Data not cleaned
---------------	------------------

**HES field name**    **CDS unique identifier**

Field	cdsuniqueid
-------	-------------

Class	System
-------	--------

Length and format	35an
-------------------	------

Availability	2007-08, Quarter 3 onwards
--------------	----------------------------

**Description**

CDS unique identifier.

**Value**

35an = CDS Unique identifier

Data cleaning	Data not cleaned
---------------	------------------

**HES field name**    **Combined grossing factor**

Field	gross_b
-------	---------

Class	System
-------	--------

Length and format	7n
-------------------	----

Availability	
--------------	--

**Description**

This field contains a value, calculated to four decimal places, that combines administrative (coverage) grossing (the value contained in data item gross\_a) and clinical grossing. Clinical grossing compensates for the under counting of diagnoses or operations that occurs where cases contain a not known diagnosis code.

The diagnostic data in a predefined group is analysed to ascertain the proportion of records that do not have a valid primary diagnosis. This shortfall in diagnostic coding is used to calculate a compensating factor.

The clinical factor is multiplied by the value in gross\_a to produce the combined grossing factor, gross\_b. The default value for this field is 1.0000. It is overwritten when clinical grossing is selected.

**Value**

nn.nnnn = Combined grossing factor

Data cleaning	Not applicable
---------------	----------------

**HES field name**    **Coverage grossing factor**

Field	gross_a
-------	---------

Class	System
-------	--------

Length and format	7n
-------------------	----

Availability	
--------------	--

**Description**

This field contains a value that compensates for missing or additional HES records.

The number of finished HES records in a predefined group are compared with the number for the same group reported from another source (currently the HES Activity Count).

The ratio between the two provides a correction factor that can be applied to HES data. The default value for this field is 1.0000.

**Value**

nn.nnnn = Coverage grossing factor

Data cleaning	Not applicable
---------------	----------------

**HES field name**    **Date data received**

Field	subdate
Class	System
Length and format	dd/mm/yyyy (Date)
Availability	From 2000-01

**Description**

Date on which the data used to generate the HES record was received by the Secondary Uses Service (or the NHS-Wide Clearing Service (NWCS) prior to December 2006).

**Value**

dd/mm/yyyy = Date data received

Data cleaning	Data not cleaned
---------------	------------------

**HES field name**    **Ethnic category (audit version)**

Field	ethrawl
Class	System
Length and format	1an
Availability	

**Description**

Ethnic category is supplied by the trusts as a two-character field. The left-hand character should contain the national code. A copy of the raw data found in the left hand character is held in ethrawl.

**Value**

9 = Not Known (if ethrawl also = 9)

Data cleaning	None
---------------	------

**HES field name**   **Ethnic character (audit version)**

Field	ethraw
-------	--------

Class	System
-------	--------

Length and format	1a
-------------------	----

Availability	
--------------	--

**Description**

Ethnic character is supplied by the trusts as a two-character field. Ethraw contains the left-hand character.

The right hand character being available for local use. A copy of the raw data found in the right hand character is held in ethrawl.

**Value**

A = British (white)

B = Irish (white)

C = Any other white background

D = White and Black Caribbean (mixed)

E = White and Black African (mixed)

F = White and Asian (mixed)

G = Any other mixed background

H = Indian (Asian or Asian British)

J = Pakistani

K = Bangladeshi (Asian or Asian British)

L = Any other Asian background

M = Caribbean (Black or Black British)

N = African (Black or Black British)

P = Any other Black background

R = Chinese (other ethnic group)

S = Any other ethnic group

X = Not known

Z = Not stated

Data cleaning	None
---------------	------

**HES field name**    **NHS number status indicator**

Field	nhsnoind
-------	----------

Class	System
-------	--------

Length and format	2n
-------------------	----

Availability	From 2002-03
--------------	--------------

**Description**

Codes in this field indicate whether the patients' NHS Number is present, and if it is verified. If the NHS Number is absent, the indicator gives the reason why.

**Value**

01 = Number present and verified

02 = Number present but not traced

03 = Trace needed

04 = Trace attempted: no match, or multiple matches, found

05 = Trace needs to be resolved: New NHS Number or patient detail conflict

06 = Trace in progress

07 = Number not present and trace not needed

08 = Trace postponed (baby under six-weeks old)

91 = Patient identity withheld (derived from SUS if not equal to 90) (from 2009-10 onwards)

Data cleaning	None
---------------	------

**HES field name**    **Origin of primary care group**

Field	pcgorig
Class	System
Length and format	1n
Availability	From 1999-00 to 2005-06

**Description**

This derived field indicates the basis on which the primary care group (PCG) code was assigned.

**Value**

- 1 = GPPRAC was used to derive the code
- 2 = REGGMP was used to derive the code
- 3 = PURCODE was used to derive the code
- 4 = POSTCODE was used to derive the code
- 5 = POSTCODE allocated code, PCG code was blank
- 6 = POSTCODE allocated code, PCG code was 49998
- 9 = PCG code not known

<b>Data cleaning</b>	Not applicable (derived by rule 1160)
----------------------	---------------------------------------

**HES field name**    **Origin of primary care trust of responsibility**

Field	pctorig
-------	---------

Class	System
-------	--------

Length and format	1n
-------------------	----

Availability	From 1997-98 to 2005-06
--------------	-------------------------

**Description**

This derived field indicates the basis on which the primary care trust (PCT) of responsibility code was assigned.

**Value**

- 1 = GPPRAC was used to derive the code
- 2 = REGGMP was used to derive the code
- 3 = PURCODE was used to derive the code
- 4 = POSTCODE was used to derive the code
- 5 = POSTCODE allocated code, PCT code was blank
- 6 = POSTCODE allocated code, PCT code
- 9 = PCT code not known

<b>Data cleaning</b>	Not applicable (derived by rule 1160)
----------------------	---------------------------------------

**HES field name**    **Origin of primary care trust of responsibility - historic**

Field	pctorig02
-------	-----------

Class	System
-------	--------

Length and format	1n
-------------------	----

Availability	From 2006-07
--------------	--------------

**Description**

This derived field indicates the basis on which the primary care trust (PCT) of responsibility code was assigned.

**Value**

- 1 = GPPRAC was used to derive the code
- 2 = REGGMP was used to derive the code
- 3 = PURCODE was used to derive the code
- 4 = POSTCODE was used to derive the code
- 5 = POSTCODE allocated code, PCT code was blank
- 6 = POSTCODE allocated code, PCT code was 59998
- 9 = PCT code not known

Data cleaning	Not applicable
---------------	----------------

**HES field name**    **Origin of primary care trust of responsibility - current**

Field	pctorig06
Class	System
Length and format	1n
Availability	From 2006-07

**Description**

This derived field indicates the basis on which the primary care trust (PCT) of responsibility code was assigned.

**Value**

- 1 = GPPRAC was used to derive the code
- 2 = REGGMP was used to derive the code
- 3 = PURCODE was used to derive the code
- 4 = POSTCODE was used to derive the code
- 5 = POSTCODE allocated code, PCT code was blank
- 6 = POSTCODE allocated code, PCT code was 59998
- 9 = PCT code not known

<b>Data cleaning</b>	Not applicable
----------------------	----------------

**HES field name**    **Patient identifier (HES generated) - basis of match**

Field	matchid
Class	System
Length and format	1n
Availability	From 1997-98

**Description**

This field indicates the basis on which the HES ID was allocated.

**Value**

<b>Data cleaning</b>	Not applicable
----------------------	----------------

**HES field name**    **Record identifier**

Field	epikey
-------	--------

Class	System
-------	--------

Length and format	8n
-------------------	----

Availability	
--------------	--

**Description**

This is a record identifier that is created by the HES system. The eight digits store a decimal number.

**Value**

8n = Record identifier

Data cleaning	Not applicable
---------------	----------------

**HES field name**    **SUS loaded staging date**

Field	suslddate
-------	-----------

Class	System
-------	--------

Length and format	dd/mm/yyyy (Date)
-------------------	-------------------

Availability	2007-08, Quarter 3 onwards
--------------	----------------------------

**Description**

The date that the data was loaded into the SUS staging system.

**Value**

dd/mm/yyyy = SUS loaded staging date

Data cleaning	Data not cleaned
---------------	------------------

**HES field name**    **SUS record id**

Field	susrecid
-------	----------

Class	System
-------	--------

Length and format	14n
-------------------	-----

Availability	2007-08, Quarter 3 onwards
--------------	----------------------------

**Description**

SUS generated record identifier.

**Value**

14n = SUS record ID

Data cleaning	Data not cleaned
---------------	------------------

**HES field name**    **SUS generated Spell ID**

Field	susspellid
-------	------------

Class	System
-------	--------

Length and format	10n
-------------------	-----

Availability	From 2009-10
--------------	--------------

**Description**

SUS generated Spell ID

**Value**

10n = SUS spell ID

Null = Records that have excluded from PbR in SUS as the activity is outside the scope of PbR

Data cleaning	Data not cleaned
---------------	------------------

## Index

acpdisp (Augmented care period disposal)	17
